

Green Analytic Solutions Presents

GHG Project Developer Certification

Based on ISO 14064-2:2019

**Design Credible, Verifiable, and
Impactful Climate Mitigation
Projects**

About the Training

This certification course empowers participants to **design, manage, and document GHG mitigation projects** aligned with **ISO 14064-2:2019** — the global standard for **project-level GHG quantification, monitoring, and reporting.**

Learn how to create projects that deliver **real, measurable, and additional** emission reductions suitable for voluntary or compliance carbon markets.

Why This Training Matters

With climate finance and carbon markets expanding rapidly, organizations need professionals who can structure robust **GHG reduction projects that meet international standards.**

This training prepares you to deliver carbon integrity, transparency, and credibility in mitigation project development.

Who Should Attend?

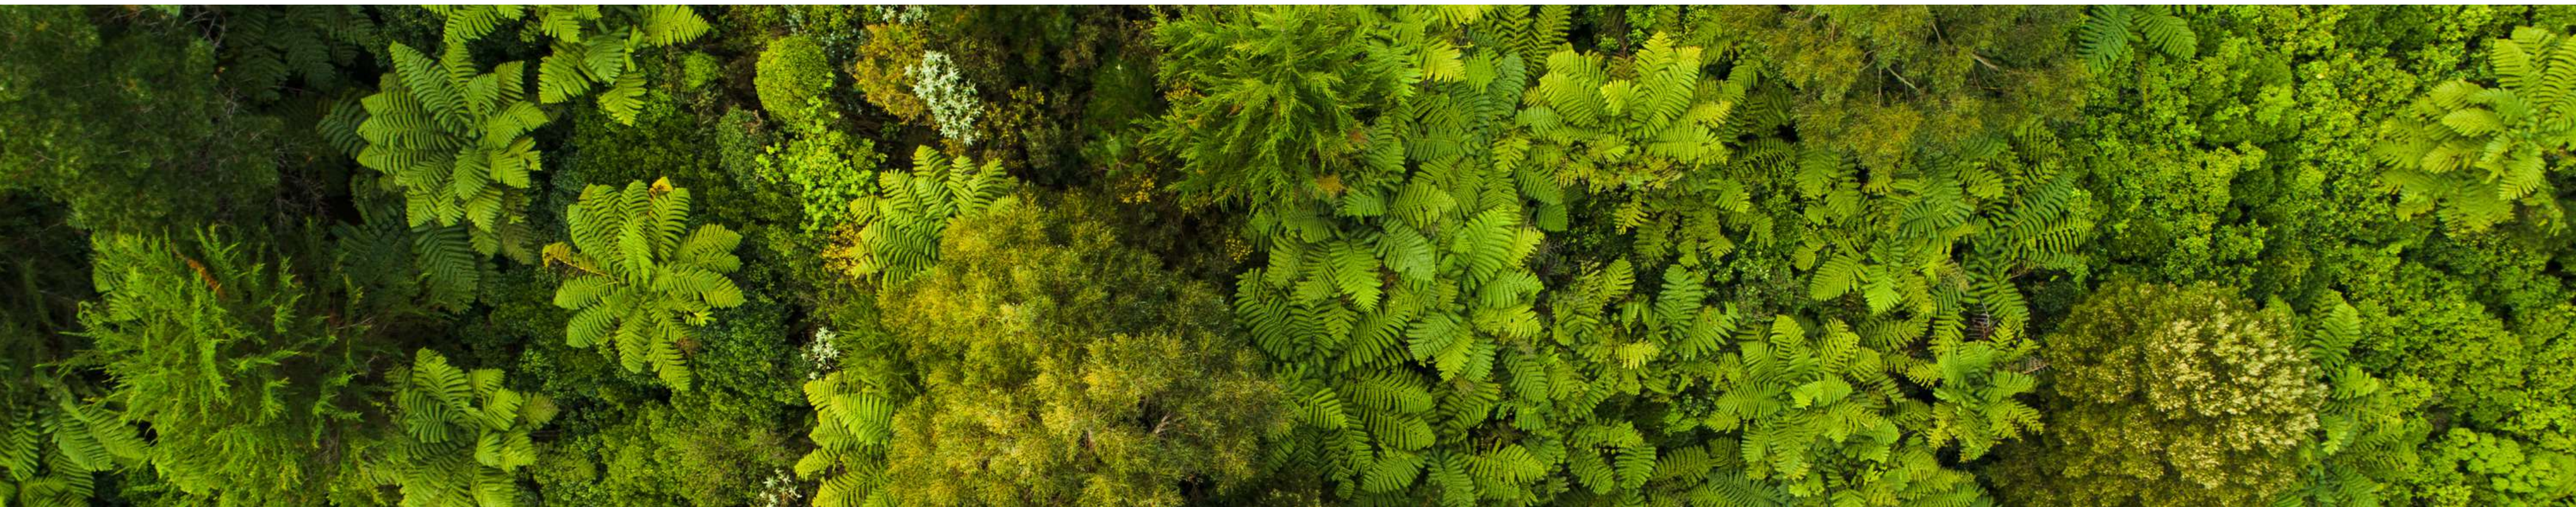

- Carbon Market Practitioners & Offset Project Developers
- ESG & Sustainability Consultants
- Environmental Engineers & Climate Professionals
- GHG Auditors & Verifiers
- NGOs & Government Officers in Climate Programs
- Professionals working on CDM, VERRA, GS, or Article 6 initiatives

What You Will Learn

- Structure and principles of ISO 14064-2
- Defining project boundaries and GHG sources/sinks
- Establishing credible baselines
- Understanding additionality and leakage
- Emission reduction quantification methodologies
- Developing effective monitoring plans
- Reporting, documentation, and validation-readiness
- Linkages with VCM standards and Article 6 mechanisms

Training Highlights

- Led by ISO 14064-2 experienced professionals
- Real-world case studies from energy, waste, AFOLU, and industrial sectors
- Templates for project documentation & emission calculations
- Certification from Green Analytic Solutions
- Post-training support and resources

Program Information

- **Mode:** Live Online / In-person
- **Duration:** 2 Days (with interactive sessions + practicals)
- **Certification:** GHG Project Developer (ISO 14064-2)
- **Level:** Intermediate to Advanced

Build the expertise to lead carbon mitigation initiatives!

Become a certified GHG Project Developer and create high-impact, verifiable projects under ISO 14064-2.
