Green Analytic Solutions Presents

ISO 14068:2023 Carbon Neutrality Standard

Professional Training & Certification Program

Build Expertise.
Drive Climate Action.
Ensure Credibility.

About the Course

GCS

ISO 14068:2023 is the groundbreaking international standard that establishes a clear, science-based pathway for achieving and claiming carbon neutrality. This professional training program is designed to equip sustainability professionals, consultants, and corporate teams with the knowledge to interpret, implement, and verify carbon neutrality in line with ISO 14068 requirements.

Whether you're navigating corporate ESG goals or managing net-zero projects, this course offers practical insights and international best practices aligned with the latest climate frameworks.

GCS

Learning Objectives:

- Understand the structure and principles of ISO 14068
- Gain knowledge of GHG quantification, reductions, and offsets
- Learn how to design a credible carbon neutrality strategy
- Explore validation, verification, and declaration processes
- Interpret carbon neutrality claims in alignment with ISO and GHG Protocol

Course Highlights:

- Expert-led sessions by accredited professionals
- Case studies from real-world carbon neutral initiatives
- Tools, templates, and frameworks for implementation
- Certification of completion issued by Green Analytic Solutions
- Ideal for professionals in sustainability, ESG, and climate strategy

Who Should Attend?

- Sustainability and ESG Officers
- Environmental Consultants
- Corporate Strategy Teams
- Academicians and Researchers in Climate Policy
- Students pursuing careers in carbon accounting and GHG management

Join the Next Generation of Climate Leaders
